Celebrate May with the Largest Spring Blooms Display in Wisconsin

*More Than 350,000 Blooms Provide Stunning Backdrop
for Spring Activities at Green Bay Botanical Garden*

(Green Bay, WI) (April 25, 2023) - After the long and cold winter, [spring blooms](#) are starting to pop up all over the beautiful landscape of Green Bay Botanical Garden!

From mid-April through May, more than 350,000 spring bulbs put on a spectacular show – the largest spring display in the state of Wisconsin. From daffodils and tulips to hyacinths and windflowers, you can enjoy the vibrant colors and wondrous scents of these blooms throughout spring.

Find these new flower blends this May:

- Purple, red, and yellow Super Collider™ tulip blend in the parking bay beds
- Pink, red, and orange Power Play™ tulip blend outside the Fischer Visitor Center
- Pink, purple, and white Nightingale™ tulip blend in front of the Schierl Wellhouse
- Pink, purple, and yellow Slam Dunk tulip blend near the Stumpf Belvedere
- Pink Hugs and Kisses tulip blend and Golden Earring™ daffodil blend by the Kaftan Lusthaus

Our collection of over 100 magnolias also blooms around the same time as our spring bulb display, so there will be blossoms in the sky as well as on the ground – they bloom around the first two weeks of May. Our thousands of spring flowering perennials, shrubs, and other trees will be flourishing too!

Spring blooms will be on display for guests to see throughout May, weather permitting. **Peak bloom is anticipated mid-May through the end of the month.**
